## SUMMARY

This bibliography contains references to over 2000 Soviet statistical handbooks known to have been published since the mid-1950's. This is the fourth version of such a bibliography compiled by the Center for International Research (formerly Foreign Demographic Analysis Division), but the first to include national, international, and foreign trade handbooks; previous editions (Gillula, 1979; Gillula, 1980; and Heinemeier, 1984) were confined to regional statistical handbooks. References to 299 national and 136 international handbooks are included in addition to republic and regional handbooks published since the last edition. Data on the *tirazh* (number of copies) and price of each handbook also are included in this edition. A geographical index and three summary tables have been added (as appendixes) in order to make the bibliography easier to use.

In addition to those citations contained in the bibliography, a recent issue of *Novyye knigi* (no. 13, 1988) contained references to a number of branch and topical handbooks, to be published in 1989, that have either never previously been published or which have not been published in many years. This is in keeping with the spirit of *glasnost'* and is in response to calls for the publication of more statistics by many Soviet social scientists. Those handbooks to be published which have been published previously are:

- *Kapital'noye stroitel'stvo SSSR. Statisticheskiy sbornik.* (1961)
- *Narodnoye obrazovaniye, nauka i kul'tura v SSSR. Statisticheskiy sbornik.* (1977)
- *Naseleniye SSSR. Statisticheskiy yezhegodnik.* (1984)
- *Promyshlennost' SSSR. Statisticheskiy sbornik.* (1964)
- *Sel'skoye khozyaystvo SSSR. Statisticheskiy sbornik.* (1971)
- *Sovetskaya trgovlya. Statisticheskiy sbornik.* (1964)
- *SSSR i zarubezhnyye strany. 1987. Statisticheskiy sbornik.* (1970)
- *Transport i zvyaz' SSSR. Statisticheskiy sbornik.* (1972)
- *Trud v SSSR. Statisticheskiy sbornik.* (1968).

The year in parenthesis, following the title, is the last year in which a volume of that type was published. In addition to these, the following list of never before published topical handbooks are to appear:

- *Agropromyshlennyy kompleks SSSR. Statisticheskiy sbornik.*
- *Okhrana okruzhayushchey sredy i ratsional'noye ispol'zovaniye prirodnkh resursov v SSSR. Statisticheskiy sbornik.*
- *Sotsial'noye razvitiye i povysheniye urovnya zhizni naseleniya SSSR. Statisticheskiy sbornik.*
- *Tekhnicheskyy progress v SSSR. Statisticheskiy sbornik.*
- *Material'no-tekhnicheskoye snabzheniye narodnogo khozyaystva SSSR. Statisticheskiy sbornik.*

In addition to the fact that these volumes have either never been published before or have not been published in a very long time, it is quite unique that they are all planned to be published in the same year. This amount of data has never previously appeared at the same time.

## PREFACE

The Center for International Research (CIR) conducts economic and demographic studies. The results of these studies are issued as CIR Staff Papers. A complete listing of these papers is included at the end of this report. The use of data not generated by the U.S. Bureau of the Census precludes performing the same statistical reviews the Bureau does on its own data.

The Russian language library at the Bureau of the Census's Center for International Research is a major U.S. government repository of Soviet economic, demographic, and statistical materials. The library possesses about two-thirds of the Soviet statistical handbooks published since the mid-1950's, when the publication of statistical materials was resumed after a nearly-20-year hiatus. This bibliography chronicals these holdings and provides references to other statistical handbooks culled from various bibliographic sources. The bibliography is designed as a reference tool for analysts working on various aspects of the Soviet economy or society. Information concerning the availability of statistical handbooks not in the collection of the Center for International Research would be appreciated.

The author would like to thank Deborah A. Kinnaman for final editing and Matthew J. Sagers for review and comments. The author would especially like to thank Dr. Sagers for his careful review of the Soviet geographic names contained in the bibliography. Any errors that remain are, however, solely mine.

Comments and questions regarding this study should be addressed to Matthew J. Sagers, Chief, Soviet Branch, Center for International Research, U.S. Bureau of the Census, Scuderl Building, Room 710, Washington, D.C. 20233; telephone (301) 763-4023.

## INTRODUCTION

This is the fourth version of a bibliography of statistical handbooks published in the Soviet Union since the mid-1950's. Previous editions were compiled by James W. Gillula in 1979 and 1980 and Meredith M. Heinemeier in 1984. All were entitled *Bibliography of Regional Statistical Handbooks in the U.S.S.R.* This edition has been renamed *Bibliography of Soviet Statistical Handbooks* in order to reflect the addition of national or all-union abstracts and international or foreign trade handbooks. References to general USSR handbooks published since 1917 were included although very few of these are in the Russian language library of the Center for International Research (CIR).

There are references to 299 national and 136 international handbooks in this bibliography. References to republic and regional handbooks that have been published since Heinemeier's third edition are also included. References to publications not received by CIR were cited in *Khizhnaya letopis'*, *Knizhnoye obozreniye*, *Novyye knigi*, and *Soviet Studies'* annual list of Soviet statistical handbooks.

The bibliography is divided into 18 chapters, 1 for the USSR, 1 for each of the 15 union republics, 1 for Central Asia, and 1 for international handbooks. Each chapter is divided into sections according to type of handbook. With the exception of the chapter on international handbooks, each numbered section contains the same type of handbooks from chapter to chapter. For example, section 1 contains general handbooks and section 14 contains agricultural handbooks. This was done so that a researcher who wanted to quickly find all the handbooks on a particular topic could simply look in the appropriate section number in the first 17 chapters. Sections numbers 30 to 39 are reserved for new branch or topical handbooks that might be published. Section numbers 45 to 49 are reserved for new regional (other than the RSFSR and the Ukrainian SSR) handbooks that might be published. This also means that each chapter does not contain each numbered section if a handbook on a certain topic has never been published for a particular republic.

The sections for the USSR and republic handbooks are:

Section 1 general - Includes comprehensive statistical abstracts; usually having the subtitle *Statisticheskii yezhegodnik* or *Yubileynyy statisticheskii yezhegodnik*.

Section 2 short general - Includes handbooks that are shorter, less detailed and published earlier than the general handbooks; usually subtitled either *Kratkiy statisticheskii sbornik* or --- *SSR v tsifrakh*.

Section 3 summary statistical handbooks - Contains the compendium *Sbornik statisticheskikh materialov* and other summary or special edition abstracts.

Section 4 industry - Covers all of industry or a particular branch of industry.

- Section 5 coal - Contains abstracts on the coal industry.
- Section 6 forestry - Includes forestry handbooks.
- Section 7 energy - May include all types of energy or just one energy sector.
- Section 8 transportation and communications - Includes abstracts on transportation and communications.
- Section 9 capital construction - Includes abstracts on capital construction.
- Section 10 housing, utilities, and services - Includes abstracts on housing, utilities and services.
- Section 11 public dining - Includes abstracts on public dining.
- Section 12 technical progress - Includes abstracts on technical progress.
- Section 13 internal trade - Includes handbooks usually titled retail trade or *Sovetskaya trgovlya*.
- Section 14 agriculture - May include abstracts covering all of agriculture or one branch of agriculture.
- Section 15 labor - Includes handbooks on wages and trade unions.
- Section 16 population - Includes volumes from the three Soviet censuses during the period and special edition abstracts.
- Section 17 women and children - May cover both women and children or coverage may be confined to women only.
- Section 18 public health - Includes abstracts on public health.
- Section 19 culture and education - Includes abstracts on culture and education.
- Section 20 publishing - Includes the annual *Pechat'* volumes and special editions.
- Section 21 plan fulfillment reports - Comprises the annual *SSSR i soyuznyye respubliki*.
- Section 22 budgets - Includes budget abstracts.
- Section 23 planning documents - Includes annual or five-year plan documents.

Section 24 government - Comprises election results compendiums.

Section 25 Communist Party - Includes abstracts on the Communist Party.

Section 26 atlas - Carries the title *Statisticheskii atlas*.

Section 27 science and technology - Includes abstracts on science and technology.

Section 28 economics - Includes input-output model abstracts.

Section 29 fishing - Includes abstracts on fishing.

Section 40 - With the exception of the RSFSR and the Ukrainian SSR, this section includes republic capital city handbooks or the oblast' handbook containing the republic capital.

Section 41 to 44 - With the exception of the RSFSR and the Ukrainian SSR, includes regional handbooks on regions other than the republic capital.

Section 50 to 60 - Comprises regional handbooks for the RSFSR and the Ukrainian SSR, grouped by economic region; refer to the detailed table of contents for a more complete breakdown; Kalinigrad Oblast' is included in the Northwest economic region.

The sections for international handbooks are:

Section 1 foreign trade - Includes the annual *Vneshnyaya torgovlya SSSR*.

Section 2 special foreign trade editions - Includes occasional summary compendiums of foreign trade covering a certain period.

Section 3 SEV handbooks - Includes the annual statistical handbooks of the Council for Mutual Economic Assistance, *Statisticheskii yezhegodnik stran-chlenov Soveta Ekonomicheskoy Vzaimopomoshchi*.

Section 4 other SEV handbooks - Includes short volumes of the handbooks in section 3.

Section 5 socialist sphere, economy - Comprises the plan fulfillment reports of the socialist countries, *Narodnoye khozyaystvo sotsialisticheskikh stran v 19-- godu*.

Section 6 socialist sphere, other - Includes branch or topical handbooks covering the socialist countries.

Section 7 socialist sphere, comparisons - Includes the annual *Mir sotsializma v tsifrakh i faktakh*.

Section 8 international comparisons and other - Includes the periodic *My i planeta. Tsifry i fakty* and other special topic international abstracts.

To facilitate the use of this bibliography, there are two tables of contents. One is a brief table of contents that contains only the page numbers for the chapters. The other is more detailed, containing the page numbers for each section. The detailed table of contents is 9 pages long, which makes it cumbersome to use, for certain purposes.

The transliteration system used is that of the Board on Geographic Names. Most of the bibliographic entries are given in transliterated Russian. Exceptions to this are when the handbook or reference was only in Ukrainian, in which case, the citation would be in transliterated Ukrainian. A few citations are in English because the copy of the handbook in the CIR library is in English. Abbreviations used in the bibliography are the following:

Gos kom:	Gosudarstvennyy komitet
Goskomstat:	Gosudarstvennyy komitet po statistike
Gos stat izd:	Gosudarstvennoye statisticheskoye izdatel'stvo
Knizh izd:	Knizhnoye izdatel'stvo
Krat stat sprav:	Kratkiy statisticheskiy spravochnik
Mat:	Materialy
Min:	Ministerstvo
Otd:	Otdeleniye
Polit lit:	Politychnoyi literatury
Resp:	Respublikanskiy
Stat:	Statisticheskiy or statystichnyy
Stat sbor:	Statisticheskiy sbornik
Stat sprav:	Statisticheskiy spravochnik
Stat yezh:	Statisticheskiy yezhegodnik
SU:	Statisticheskoye upravleniye
TsSU:	Tsentral'noye statisticheskoye upravleniye

The language that the handbook was published in is also included. Bilingual publications are distinguished from those published separately in more than one language. An example of the form of a bilingual publication is "In Russian and Estonian." If published separately in more than one language, it is cited "In Russian; also in Estonian." This distinction is not completely reliable if the book is not in the CIR library.

A code number or the letters "CIR" (at the end of the citation) indicate that the handbook is in the CIR library. The code number refers to CIR's in-house coding system.

Price and *tirazh* (number of copies) information is also included for most entries. This information is in parenthesis at the end of each citation. If the book was published separately in more than one language, the *tirazh* of the Russian edition is given, except for the Ukrainian handbooks, where the *tirazh*

of the Ukrainian edition is used. A price of zero rubles could mean either that it was not given or that it was *besplatno*, or not for sale. If separate prices were given for hard and soft cover editions, the hardcover price was used.

There are six appendixes at the end of the bibliography. The first is a geographical index. Only the current names of cities and oblast's are listed. The second, third, and fourth appendixes are summary tables of the national, republic, and regional handbooks, respectively, for the years from 1955 to 1988. These are designed to aid the user in quickly assessing the availability of handbooks for a particular year, topic or region. There are three possible entries in these tables. An "X" indicates that a handbook was published and that it is in the CIR library; an "(X)" shows that a handbook was published but is not in the CIR library; and a blank indicates that there is no record of a handbook being published for that year. An "X" could mean that there were two handbooks published, one of which is in the CIR library and another which is not. An "X" could also mean that there was more than one handbook published. In the regional table, no distinction is made between a general handbook and a topical handbook. Users should refer to the bibliography to determine the coverage.

Appendixes 5 and 6 total the number of handbooks by year and chapter. In appendix 6, the sums of the different types of handbooks, in the last row, do not add to the total because there is not a column for international handbooks.
